★ Efficient

Power Blast is the most efficient blast freezer at 100 to 2,000 lb/hr.

★ Flexible

Change products, blast times, and blast temperatures quickly.

The Power blast can be set up to automatically move from blast mode to hold mode to prevent product damage and lower operating cost.

BMIL Technologies

Email: bmil@bmil.com, Web: www.bmil.com

★ Green

Power Blast utilizes the Frio Verde system to use less energy in the blast process for a lower CO₂ impact.

★ Larger Capacity Designs

With additional design consideration BMIL can bring POWER BLAST to capacities as high as 8,000 lb/hr
